

James Shannon Joins Architectural Engineers

BOSTON (November 16, 2016) - [Architectural Engineers, Inc. \(AEI\)](#), a WBE/DBE mechanical, electrical, plumbing, fire protection (MEP/FP), and lighting design services firm based in Boston, announced today that James Shannon, PE, LEED AP has joined the firm as its plumbing and fire protection department head. Jim is a registered fire protection engineer with 16 years of experience in the building industry.

Jim's specialties involve the design of fire protection systems in many building types, including identification of applicable codes and standards pertinent to each project. Through his experience, he has developed fire protection standards for several independent fire protection companies, as well as for departments within already established firms.

At AEI, Jim will be responsible for design, review, and oversight of the plumbing and fire protection group, including review of final submittals and design documents. Jim will stamp AEI's fire protection drawings and provide project management for AEI's plumbing and fire protection projects.

"Jim came to us at a time when we were actively seeking to take our firm to the next level. His expertise, industry experience, and licensure is the exact combination of skills required for us to maintain a level of standards upon which our clients have come to rely," said Robin Greenleaf, PE, LEED AP, president of AEI. "He has held departmental leadership roles with some well-respected firms in Boston, and we are pleased to have him on our team."

A graduate of Worcester Polytechnic Institute for both his bachelor's and master's degrees, Jim is a registered fire protection engineer in Massachusetts, Florida, Missouri, and the U.S. Virgin Islands.

About Architectural Engineers, Inc.

Certified by the state of Massachusetts as a woman owned business (WBE) and disadvantaged business (DBE) since 1986, Architectural Engineers, Inc., is a mechanical, electrical, plumbing, fire protection, and lighting design services firm serving the federal government, state and municipal, and private sectors. With a deep commitment to client service, engineering excellence, and seamless collaboration, AEI provides owners in the laboratory and life sciences, arts and culture, corporate, academic, and public building industries with a high-degree of value through all phases of a project's life-cycle. Clients trust AEI to pay careful attention to system selection, building performance, cost, energy use and enhanced opportunities, and count teamwork, strategic council and a solutions-oriented approach among its strengths.
